

# POWERFUL & RELIABLE SYSTEMS

iCon<sup>®</sup>  
SERIES

*introducing the*  
**iCon FLATLINE  
COATING SYSTEM**

- Seamless Integration
- Easy to Maintain
- For Water and Solvent-Based Coatings
- Available in 32:1 or 36:1

The NEW iCon Flatline Coating System is available in two configuration options: 32:1 or 36:1, providing flexibility based on your specific needs. Ideal for both water-based and solvent-based coatings, the iCON Flatline Coating System delivers consistent and reliable performance. Its capability to spray with multiple automatic guns enhances efficiency and productivity. The self-adjusting packings contribute to lower maintenance requirements by preserving the integrity of the piston, allowing for longer intervals between maintenance cycles. Along with the inclusion of an external filter and recirculating valve, priming and clean-up become effortless. For enhanced precision in pressure regulation and fluid delivery, an optional high-pressure regulator is available. Experience the convenience and performance of the iCon Flatline Coating System, designed to optimize your painting processes.
